Key competencies

Analytics and interface design

Users' insights research, information architectures development, CJM maps creation, interactive and visual design of user interfaces, including B2B/B2C projects of high level difficulty. The most effective solutions to business needs through the prism of visual perception.

Specialization

- e-commerce projects: online stores, B2C / B2B portals, selling landing pages
- corporate resources: representative websites, corporate intranet web services

Key competencies

Creative concept development

Briefing, art assignments drafting, page concepts and master layouts development, UI-kit packages and icons design. The set up of Wow animations scenarios for front-end teams. Logos, corporate visual identities and brand-book creation.

Design layouts development

Responsive web design, mobile design, application and product design, user interface development. Search, development and implementation of custom design solutions. Great attention to detail. My experience and acquisitions instill love of visual design and desire to create just the best niche products.

Design implementation control

Quality control over interfaces implementation by developers at each stage of production until the project is launched. Ability to work on several projects simultaneously.

About

I am always ready to try something new and discover more opportunities in the field of web and mobile products. I consider myself to be a hard working, reliable person, working with passion and desire to make all projects surprisingly easy to use. I follow the latest trends in web and graphic design. I like to attend various design events and lectures. And I go in for sports.
